

Transition to Mission Club

Mission Club, also known as our out-of-school-time care, offers children engaging learning and recreational experiences in a variety of different ways when children are not in school.

We believe that children deserve to have a safe comfortable space to go to after school that offers a variety of different ways to support child development. Here are some ways the Mission Club contributes to your child's continued growth:

Safe and Supportive Environment

Our programs are designed to create a safe and enriching space where children can thrive both before and after school, as well as during summer breaks. This environment not only ensures physical safety but also fosters emotional security, allowing children to feel comfortable and supported. By maintaining consistency and stability, our programs contribute to the positive development of children, promoting social, emotional, and academic growth in a nurturing atmosphere.

Social and Emotional Development

Our school-age care programs offer valuable opportunities for children to cultivate friendships and form relationships with adult role models. These experiences support the development of essential social skills, boost self-esteem, and enhance their ability to resolve conflicts effectively. By engaging in positive interactions within a supportive environment, children learn important life skills that contribute to their overall social and emotional well-being.

Academic Development

Our programs provide homework assistance and engaging educational activities that reinforce learning beyond school hours. By supporting academic growth in a structured environment, we help children succeed academically and reduce the likelihood of engaging in risky behaviors.

Physical Health

Many of our programs emphasize physical activity, promote healthy habits, and offer nutritious food options. These initiatives are designed to enhance overall well-being and instill lifelong habits for a healthy lifestyle.

Classroom Zones

Our Mission Club is divided into specific zones that ensure student success. You will see Art, Stem, spiritual development, Community Service, Homework, and Drama. Each zone is carefully cultivated to keep children excited to come to the Mission Club after school, during holiday vacations, and during summer break.

Collaborative Projects & Community Service

Each month children work together to create a specific project that they collaborate on. This teaches them how to work with others, listen to other people's ideas, and see something to the end. In addition, our Mission Club completes an act of community service each month, learning the importance of giving back to others in the community. This could be something as simple as making doggie treats for a local shelter or writing cards to residents in a local nursing home. Our goal is to help children learn the art of giving back and generosity to the people within your community!

Our Mission Club offers a nurturing environment where children thrive, ensuring safety and enrichment before and after school. Through relationships with adult role models, we foster social skills, self-esteem, and effective conflict resolution children are sure to thrive.

Mission Club Personal Belonging Reminders

- Children should wear closed-toe, hard-bottom shoes, and breathable clothing daily to facilitate outdoor play.
- Please provide a labeled sippy cup for water each day.
- To prevent mix-ups, please label your child's clothing with their first and last name, especially items like jackets which can easily be mistaken and taken home by another parent.
- Children have a backpack hook and cubbie for personal items. Please ensure your child's cubbie is checked daily for artwork and Mission Club reminders.
